Campbellsport	03	0900CST			0	0			Hail (1.00)
<b>Dodge County</b>									
Iron Ridge	03	1105CST			0	0			Hail (1.00)

Scattered severe thunderstorms deposited large hail across parts of eastcentral Wisconsin. In addition, very heavy rains of 1 to 2 inches in the pre-dawn hours resulted in small stream and urban flooding in southcentral and southeast Wisconsin. In Dane county, a mudslide was reported about 3 miles north of Mt. Horeb at the intersection of Highway 78 and County Trunk J. In Racine and Kenosha counties, there were scattered reports of water over the roads in low spots both in urban areas and in the rural areas. In Milwaukee county urban flooding was reported in Wauwatosa and in the vicinity of the county zoo. Water depth on a couple roads in Wauwatosa reached 3 to 4 feet.

<b>Milwaukee County</b>									
Milwaukee	23 24	2200CST 1800CST			0	0			Urban/Sml Stream Fld
<b>Racine County</b>									
Racine	23 24	2200CST 1800CST			0	0			Urban/Sml Stream Fld
<b>Waukesha County</b>									
Elm Grove	23 24	2200CST 1800CST			0	0			Urban/Sml Stream Fld
<b>WIZ064-067&gt;068-072</b>									
Jefferson - Lafayette - Green - Kenosha	23 24	2200CST 1800CST			0	0	26K		Flood

Long duration showers and some thunderstorms dumped 2 to 3 inches of rain across parts of southcentral and southeast Wisconsin on top of a saturated ground. Urban flooding was reported in the city of Elm Grove in Waukesha county, in the city of Milwaukee, and in the city of Racine. Water depths reached 1 to 2 feet on low spots in roads, and there were some basement flooding reports. Some of the larger rivers exceeded flood stage in the counties of Jefferson, Lafayette, Green, and Kenosha. The Pecatonica River at Martintown in southwest Green county crested at 14.31 feet on the 24th (flood stage is 11 feet), and was above flood stage through the end of the month into May. The Fox River at New Munster in Kenosha county crested at 12.30 feet on the 25th (flood stage is 10 feet), and was above flood stage through the end of the month into May. The Pecatonica River at Blanchardville in northeast Lafayette county crested at 12.67 feet on the 24th (1.67 feet above flood stage). Damage near or along these rivers was limited to basement or garage contents. Most of the other larger rivers in southcentral and southeast Wisconsin managed to reach flood stage or rise about 1/2 to 1 foot above flood stage with only minor consequences.
